A QUALITATIVE DECISION CANVAS FOR HEALTH PLAN OPERATIONS

Candidate vision by Russell Dudek · 412.287.8640 · russelldudek@gmail.com
<https://www.linkedin.com/in/russelldudek> · <https://russelldudek.github.io/highmark/>

Use this one-page record before proof design. The objective is not to score an idea; it is to make the complete operating decision visible enough to advance, bound, hold, keep human-led, or stop.

01	02	03	04	05
Workflow friction	Evidence readiness	Human authority	Adoption ownership	Measurable value

01 Workflow problem and decision burden	02 People affected and current friction
03 Authoritative systems, data, rules, and evidence gaps	04 Qualified human authority and escalation
05 Proof question, test plan, and comparison unit	06 Adoption owner, changed work, training, and exceptions
07 Value evidence and trust / risk measures	08 Advance, bounded assist, hold, human-led, or stop criteria

PORTFOLIO LEARNING RETURN

Reusable capability: Which component, control, integration, training method, or measurement pattern should compound?

Next decision: Who decides, by when, with which evidence, and what capacity follows?

Evidence boundary

This canvas is an independent candidate-created operating artifact. It does not represent Highmark's internal governance, portfolio, or current workflows.
