

Operator-technologist who turns emerging AI capability into governed, adopted, measurable operating mechanisms. I work directly at the intersection of workflow, systems, data, human authority, change execution, and operating evidence. My background combines hands-on AI workflow design with more than two decades of cross-functional operations, technical translation, quality systems, and customer-backward execution.

Candidate thesis

AI opportunity is abundant. Operating value is selective. The work is to identify the right problem, install evidence and authority before momentum, and prove value inside the workflow.

ROLE-ALIGNED CAPABILITIES

AI opportunity assessment	Human-centered workflow design	Proof design and testing
Change and adoption execution	Portfolio prioritization	Value-capture mechanisms
Technical-business translation	Risk and governance integration	Executive communication

EXPERIENCE MOST RELEVANT TO J281843

Vape-Jet

2025-Present

Director of Operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth

2017-Present

Founder / AI and Automation Advisor

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon

2014-2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and closed-loop operating mechanisms across safety, quality, customer experience, and team engagement.
- Served on the Amazon Prime Now launch team with Whole Foods and applied Lean and Gemba practices to operating problems under speed and scale.

Operating contribution

Assess the work -> design a credible proof -> embed adoption and measurement -> return reusable learning to the portfolio.

COMPLEMENTARY OPERATING DEPTH

Compunetics 2000-2013

Director of Operations and Engineering Management

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls while translating across technical, operating, and customer stakeholders.

Cardinal Building Products 2021-2023

Regional Director

- Built the company's first remote regional operation; modernized distributed customer, CRM, commercial, fulfillment, logistics, digital, and online-buying workflows; and advanced AI-enhanced route-planning concepts.

ZeusVu 2018-2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents; developed TensorFlow-based inventory and computer-vision concepts plus medical-delivery chain-of-custody designs.

Enviro Social Capital 2014-2017

Chairman of the Board

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept.

IEEE 2012-2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology through conferences, seminars, and technical programs.

EDUCATION AND CREDENTIALS

University of Pittsburgh

Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

- Google AI Essentials
- Food Safety Management Certification
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

TECHNICAL AND OPERATING TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design
· Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo
workflows · Jira · Confluence · HubSpot · Slack · GIS and mapping
workflows

Evidence discipline

Measures framed around cycle time, rework, completeness, exceptions,
quality, risk, adoption, trust, and value - never invented ROI.

HOW I WOULD CONTRIBUTE AT HIGHMARK

Identify the real problem

Map the workflow, people, systems, data, and
decision burden before proposing a model.

Design a credible proof

Align the problem statement, human authority,
measures, adoption owner, and stop criteria.

Make learning compound

Return evidence, exceptions, and reusable
patterns to portfolio prioritization and value
capture.

TECHNICAL TRANSLATION

Published industry articles, delivered technical talks, participated in the HyperTransport Consortium, and translated complex systems into operating choices for executives, technical teams, and frontline users.
